866-904-BELT (2358)
It all began in the summer of 2005 when Jeff Biegun gave his neighbor $2,000 and a riding lawn mower in exchange for a 1975 Corvette, but there was one problem, the car had no seatbelts. This was a time when new Corvette seatbelt parts were scarce and most Corvette owners spent time sifting through used parts at swap meets. As Jeff began searching for the much needed seatbelts to complete his 1975 Corvette, he soon found that the parts he needed were either unavailable, of poor quality or overpriced. Luckily for the Corvette industry, Jeff was not willing to pay more to refurbish the belts he found at a swap meet, which would almost cost more than he paid for the car. Instead he set out on a mission to produce aftermarket “Direct Fit” seatbelts at a reasonable cost for all Corvette owners. After six months of research and development Jeff was ready to launch his new product - 1974-1977 dual retractable Direct Fit seatbelt set. He drove two hours to show the new belt to one of the biggest aftermarket Corvette distributors. They took one look at the high quality, and knowing these aftermarket seatbelts were in great demand, asked when could he deliver the first order. Since then Seatbelt Solutions has created a complete line of aftermarket seatbelts for many makes and models. We have grown considerably since 2005, now servicing over 600 vendors with the same personal attention that Jeff gave to the first client. What started as the search for a solution to Jeff’s 1975 Corvette has grown into a successful business committed to finding solutions to help many car enthusiasts across the country with their seatbelt needs.

About Us

We manufacture our products in Jupiter, Fl and also have warehousing in Oceanside, CA and Elkhart, IN. We do not sell retail. We leave that to our business partners. We are a manufacturer and do not believe in competing with our vendors. Here at Seatbelt Solutions we build your seatbelts with an emphasis on customer service and safety. This is just part of what makes Seatbelt Solutions the leader in the aftermarket seatbelt industry.

Testing and Engineering

When it comes to testing, Seatbelt Solutions has followed the lead of the Original Equipment Manufacturers (OEMs). We have well-established relationships with all of them, and we are the exclusive nationwide distributor for one of them, which means we had to meet their high standards to be selected. We have toured their facilities and worked with their engineering teams. The OEMs know and understand seatbelt safety better than anyone. We have replicated the OEMs test procedures and equipment at our own facility. Our test facility has a "G" Force Machine, Tilt Lock Testing Machine, Webbing Abrasion Tester, Salt Spray tester, (2) Tensile Machines (44482.216252548, kn, 10,000 lb. And 22241.10814123, kn, 5,000 lb.) And a retractor Cycling Tester. Seatbelt Solutions is very fortunate to be located in Palm Beach County where a large number of companies have downsized or moved their operations, leaving behind some of the best engineers. They come from companies like Pratt & Whitney, Motorola, United Technologies and Sikorsky to mention a few. Seatbelt Solutions tests to the most current FMVSS 209/302 certification. We have also started 208 testing (sled or crash testing like you see in commercials) on our most popular products. A lot of other seatbelt companies talk about safety, but here at Seatbelt Solutions we are fully committed to testing and guaranteeing product safety every day. Seatbelt Solutions is the only aftermarket seatbelt manufacturer that will provide current test results on the products you purchase from us. You won’t find a company and staff more dedicated to making safe seatbelts than Seatbelt Solutions.

Seatbelt Solutions offers Original Equipment "Direct Fit" seatbelts with the original color and three or four panel webbing. All Seatbelts can be custom made with any of the 58 colors and panel webbing choices that we offer. All 1969-1982 Premium OE Styled belts come with three panel webbing, GM buckles and sleeves. The economy belts come with metal starburst buckles and seven panel webbing. We also stock a large selection of the original seatbelt vinyl parts.
Seatbelt Solutions offers Original Equipment “Direct Fit” seatbelts with seven panel webbing. All Seatbelts can be custom made with any of the 58 colors and panel webbing choices that we offer. Our 1974-1981 Camaro Series use a single retractor instead of the factory dual retractor. Our system retains the ceiling mounted retractor and uses an anchor in place of the lap belt retractor which maintains the factory appearance when installed.

Seatbelt Solutions offers a variety of Conversion Van seatbelts. We offer units designed for Captain styled mid row chairs along with 2, 3, or 4 sofa seat kits. Sofa kits have the option of detachable shoulder sashes for easier removal of the sofa or we offer non-detachable hanging sashes. Extended length units are available for Tall Top vans such as Sprinters. We also offer integrated seatbelts with custom options available to fit your specific seats. Wired end release buckles are available in different lengths with customization available. Our wired buckles come pre wired with 3 wires allowing for either an open or closed circuit. Please contact our Sales department for part numbers, pricing and other options to meet your Conversion Van needs.

- Captains Chair (Shown)
